

CEDARS-SINAI MEDICAL CENTER.
S. Mark Taper Foundation Imaging Center

Imaging for Early Disease Detection & Prevention

A variety of imaging tests are available for the asymptomatic patient at risk. However, these tests are not yet reimbursed by Medicare or many insurance companies. They require payment in full at the time of the procedure. Some of the tests can be requested directly by the patient, while others require a doctor's prescription.

Please note that payment is due at time of procedure.

Patient Name: _____

Date of Birth: _____

Reservation Number: _____

DATE OF EXAM: _____

ARRIVAL/REGISTRATION TIME: _____

Scheduling: 310-423-8000

Fax: 310-423-0137

Cardiac Scheduling: 310-423-5995

Fax: 310-423-0862

EXAMS FOR EARLY DETECTION:

- **CT Coronary Calcium Scan** - Detects and measures coronary arterial calcium (atherosclerosis), an early indicator of disease in the coronary arteries **(no physician prescription needed)**

Physician referrals needed:

- **Screening Carotid Ultrasound** - Identifies blood flow blockages to the brain (stroke risk).
- **Screening Abdominal Aortic Ultrasound** - For detection of aortic aneurysm.
- **CT Coronary Angiogram** - Earliest detection of plaque in coronary arteries.
- **Lung Screening (CT)** - Can detect lung cancer and other abnormalities of the lungs, including emphysema before it can be detected by lung function tests.
- **CT Colonography** - An alternative to colonoscopy for detection of colon cancer.
- **Whole Body CT** - Can detect cancer and other abnormalities on the chest (lungs, aorta & heart), abdomen (liver, kidneys, pancreas, gall bladder, abdominal aorta, adrenal glands, lymph nodes, & spleen) & pelvis (bladder, prostate, ovaries, & uterus) as well as skeletal problems.
- **Cerebral Aneurysm Screening (Brain MRI/MRA)** -Early detection of brain abnormalities including tumors, aneurysm and possibly predicting stroke or dementia.
- **MRI Abdominal/Pelvic** -An exam of the abdominal and pelvic regions.
- **Bone Density** -Detects osteoporosis that can lead to fractures.
